to transact such other business as may prope before them. A. HUIDEROPER, Chairman

### ANNOUNCEMENTS.

The terms for announcements in the WERKLY HEX-LED are as follows: Secale, \$10; Assembly and Trea-surer, \$5 each; Commissioner, Amilton and Jury surer, \$5 each; Commissioner, Amiltor and Jury Commissioner, Steach. Terms for announcemental in the Mossing Theato's Senate and Assembly, \$12; Transurer, \$8; Commissioner, Auditor and Jury Com-

Prim the Om this Republican, June 3.

From the Om this Republican, June 3.

Train's speech to the Vice President's Senatorial party cuts right and left. As usual, he is heading against the tide, but tells some truths that will create a sensation.

You are just in time, Mr. President, to help me settle the Indian queetion. We must introduce them to the Esquitaent. Summer's sixty page speech proves that the climate is full of nunting fields. [Laughter.] The only way to settle the question is to sell our bronclads to Russian and Japun, and give me the contract to be move the training state of the contract to be move the training states. The show that I am willing to do the for thing, I will agree to divide the profits with the President, Cablinet, Senate, House, Gavernous of States and Tanriow Weed, [laughter] and I will donate one hundred thousand dollars toward defeating Great and elevating mysoil to the Presidency. [Laughter.]

Lat the poor Indian is on the war pith. Camanche, Stone, Blackfeet, Crows, Pathette, Arandhoes, Poness, Mogains, Appears, Cheyenn & Brutes, (Igill thay, Onepapas, Yankton and Sausares! The lood y alliance is signed. The string girs is or like or death? Fight or size very large and united skay thousand strong!

The Seminode Chiler speaks for all the tribes!

"Blara with your script columns, talling the columns, a column of the columns."

"Blara with your serried columns, I will not herd the thee, The shackle ne'er again shall bird The arm that now is free.

"I scorn your professed treaty,
The puls-face I defy,
I'd curse ye with my latest b cath,
And hate you till I die "

And take you full the "
Then be it so Our Christianity has trumphed. We have bought his highlight for less han a mess of polash. How grand our clvingailon.—
We have tebunched him, robbed him, swindled him! [That's so.] Are we not his superiors? [Unghier, We make tradits only to break them! William Penn multied his without an introduced with the polarity wear, and redamn" is the liest Christian word the highes have. Most of his great fathers at Washington even for a track steeples still point toward heaven. The full in its too low down for our pulmant-topy, except with the Lutherans. Two pulloutiopy, except with the Lutherans. Two Lutheran missionaries have fast come in from the war path, and my laformant is better than the War, Department or the Interior. I sell you

instory ofight not have proved a table. Cooper never would have panted as Uneas a representative Indian, and Back Hask would have never made Johnson President, or Teamsel purded Harrason into the White Hause.

While I have an agachal doubtion for the posterial vews our authors and p inters have given of the red man's bravery and poble characteristics, I am the ongity contines that religious war to institute the naver committed greater outraves in the Old World than the entellies we have practiced upon the Indians pathe mane of Christanity, clythratic a and commerce in the New I Cheers and seed of the Indians pathe mane of Christanity, clythratic a and commerce in the New I Cheers and seed of the Indians pathe mane of Christanity, clythratic a seed of the African case of Exected Hall firing off Sepoys From the Pin, cannon. But you may search all history to a barbarhar's torture equal to Christanity. [Sonsation.] Yet externination is the frontier cry. Well, if commerce demands it, who then but, but don't call it Christanity. [Sonsation.] Yet externination is the frontier cry. Well, if commerce demands it, who then but, but don't call it Christanity. [Sonsation.] Yet externinates go to the alternost pass of the earth to civilize the healton. The Indians are too near home—you can't Christianity and the distribution of the reds. Missionaries go to the alternost pass of the earth to civilize the healton. The Indians are too near home—you can't Christianity the full and the distribution of the reds. Missionaries go to the alternost pass of the carth to civilize the healton. The Indians are too near home—you can't Christianity the dudied the full and goods with the congregation, and spoke of his amount on the water and breame personal, telling where he had divided the Indian goods with the congregation, and spoke of his amount on pass of the congregation, and spoke of his amount on pass of the was and became personal, telling where he had divided the fullian goods with the congregation, and spoke of his amount on pass

died."] For great is Diana of the Ephesians.—
[Langhter.] Negrees can be ensired—Indiana ear't. Neur distinct races of men are on the continent representing four types of horse matrer. The white man is the Arabian horse, the black man the donkey, who bears the burden. The landian is the zebra, you can never tame him; while the mulatto is the mule, who inherits most of the vices and few of the virtues of his fathers. [Loud applause.] The Indian will not be alare. Four millions of blacks were enslaved, but nary red. The reds believed in the whites and have been driven from hunting field to hunting field, until even Indian nature rebels, from the Atlantic almost to the Pacific. They hardly get actived on their new reservation before we cover it, and when we can't cheat him out of it we drive him out of it. [Shame!] Searcely five thousand out of every hundred thousand dollars voted them ever reach the ribe. The Indian Agent divides with the indian trader. The Indian trader divides with the sutter; the sutter divides with the father and the randomen and all get rich, while the Indian having lost his lands and his gume is left to starve. [Sensation.] San-tau-ta-told the whole theory the other day to General the Indian hadian Agent stonned the game is left to slave. Bensation. Sentantiol told the whole theory the other day to General Hancock, and the Indian Agent stopped the council, for he couldn't stand the Indian fire.—An Indian war will stop emigration, stop gold mining, and throw the West back for years. General Sherman says we can have peace owar. Give them justice and we can have peace

war. Give them justice and we can have pence; lojustice and war is certain. It lift, Bowlege could keep us at bay twenty years in Florida, these hostile tribes unless peacified will make us add one hundred millions to the debt. Can we afford it? [Oovode, "No, 'tis big enough already."] Most troutier towns like war, it makes trade good; hence traders and milliary nees soon become active, for ane we not a cirtuous people? "Glood!" and laughter.] The wheel within wheel system works charmingly in this enterprising community. Help no cheat the Indians and I will give you one-halt! The officer on small salury says "extermination," and the war bugle is sounded. Four Doors East of Petroleum Bank

The terms for announcements in the Wexex.\* Hexal parts collows: Essait, \$10; Assembly and Tossurer, \$5 seath; Commissioner, \$10; Assembly, \$12; Transaurer, \$8. Commissioner, and the same and the same

lispaten. Sonator Trumbul), you are right in saying that 'there is not an animal that walks or creeps that all not turn and bite if trod upon." ["True!"

will not turn and bite if trod upon." ["True!" appliance.]
Thomas Francis Meagher is an old friend of nine, but I fear he has made a mist be in holsting the black flug in Montana against an entireuse because one white men was left d by five Indians for misking immodest proposite on Indian squaw, the helle of thole title. [Longiter.] (Semotr Yates ]—" And was that so?" [Yes. My Information is nuthentle; I had it from the equaw herself. [Longiter.]
Ingree with John Govode, "that an Indian war will hust McGulloch and knock spots out of some of the military Generals." Labsoners with you, Mr. Parsona, that killing the Indian Laders is better than killing the Indian. [Beneation] Once more. Stelence, civilization, and Costen and yare ahead, as lend purchasees. When is a treatment of the stellar of the sheet and the sheet fields were purchased for a string of beness and a bottle of whisky? [Lond applance.] Alach it-Mish! Gossip About the Royal Family of Eng-

Goody About the Royal Family of England,

A horrid thought stole over me the other day as the Queen walked by me at a public execution at the West End. It was that it will not be very long before it will be hastily and that Irr M gesty the war four time of a great Indian war. [Sensation.]

Columbus was welcomed. Cabut received with open acrus.

The white man landed—need the rest be told?

The New World stretched its dark hand to the Dil.

Had the Pequot killed Miles Standish; had Powhalt at thumber wheel standish Longfellow would not have a simple of the lock of the lock of a geninal level restricted in the lines of the reconstruction of the restriction would not have a simple of the lock of a geninate, crape needs the every environment of the white attack ending the black crape needs the every environment of the bounds, and a have crape within to the lady-subses-like appearance; but as she made Johnson President, or Tecunsel put the lady-subses-like appearance; but as she with the lady and Brack Hawk would have never made Johnson President, or Tecunsel put the lady-subses-like appearance; but as she lady subses-like appearance; but as she with tells a sad heart-story, but so far as her which tells a sad heart-story, but so far as her which tells a sad heart-story, but so far as her which tells a sad heart-story, but so far as her which tells a sad heart-story, but so far as her which tells a sad heart-story, but so far as her children are concerned, she never regards the children are concerned. the may among the appearance; but its she does not intend apparently ever to leave those things off, we must speak of her as she is. She has a stony look when the public gave at her, which tells a sad heartstory, but so far as her elidifiers are concerned, able never regards the public curiosity. The kinases that go on when she meets them on those trare and public occasions, puzzle the reporters among them afterward, I am told, as to whom the Queen tracked with her lips, and while saley for a single embrace was antitied. At a late royal wedding, the representative of one of the journals, who lost that nart of the overmony, called upon his imagination, and in his narrative made Her Majesty kiss other a dozen relatives, some of whom, it turned out alterward, were not there at all; but the account was widely vowed to be the best that had been written. The Prince of Wales continues to grow stout, despite his love of exercist. People refuse to credit bilm with victures which I really believe him to possens, and are veved if you laugh at their definite but Irreconcilable stories. The Dinke of Edinburg has left on a "voyage round the world," which used to be a saying of wondrous import, but is now a commonplace. He is a thorough sailor, foul of practical jokes, enjoying the sea and careless of danger. His youngestist, the Princess Beatrice, promises to grow winto a pretty girl. She looked charming at Kensington the other day, with her long hair streaming over her shoulders. Phy that these comely young girls should never know the sweet agonies of "first love;" should be proof against the admiring glance, and true from the tender word until the proper princes come, in their formal state and regulated address. Only think of glyls growing to be dighteen without ever basing an arm winning aver the should be proof against the admiring value on the word against the admiring plance, and true from the tender word until the proper princes come, in their formal state and expected to the Rev. Mr. Holleing.

The telegraph speaks of the Rev. Mr. Holtsing er, the Revenue Assessor, as "Rov. Holt Singer the Eavetend Assister."

Col. Duncon, for the Assembly; James L. Con noly, for Associate Judge; Davies, for Commis sioner, and T. A. Morrison, for Treasurer, are nominated by large majorities. Your particular favorite,(?) Ex-Senator Thomas Hoge is allowed the privilege of slaying at home. Yours,

RADICAL.

ACCUSTA, CA, June 17.

The registration of voters commences this week in Georgia.

A white man, named W. L. Finn, a storekeeper on the Alabama and Guff road, was miredered by two freedmen, his head and face being chopped with an axe and his house burned. The minderers were arrested by colored men. The hadgenation was so great that it was with great difficulty that the whites were prevented from tyuching the culprits.

decity that the whites were prevented from typening the culprits.

Baltimone, Jane 17.

in the Circuit Court of the United States, Judge Giles presiding, in the case of Kennedy vs. Gilson, arising out of a recent suit of the Merchants' National Bank of Washington, involving the question of individual liability to the clause in the General National Banking Langthe Court to-day rendered a lengthy opinion to the effect that no suit can be maintained under said clause until the Comptroller of Currency has audited the accounts of the insolvent assistantian, and ascertained, after due notice to the creditors, the amount of his liabilities.

A letter has been recoved here from Querator o, in which it is said the General-in-Chief on the 13th ult., issued the necessary order for the It is

In which it is said the General-in-Chief on the 24th ult., issued the necessary order for the trial of Maximilian, Miramon and Mejla, in necordsnee with the two of January 22th, 1863. Maximilian requested permission to sond a telegram to the Prussian Minister in Mexico, the purport of which is to request him, and also Don Maria in Politicia, the inther of Gen. Poliscio, and the Licia intime Marientza and Martenzes, to actual is defenders. The telegram was forwarded to the parties.

parties.

The Herald's special says: Secretary Seward has tendered the Mexican mission to Gen. Steadman, and requested that he would proceed there at once. The General declined, owing to the condition of his private affairs.

The Herald's New Orleans special says: Minter Combined Regimes stating what has there.

at once. The General declined, owing to the condition of his private affairs.

The Herald's New Orleans special says: Minister Campbell declines stating what has transpired between the State Department and himself, but feels assured the people will not sustain him and the profition he has taken, when the records are published.

The Herald's Philadelphia special says: The most violent rain storm ever known in this vieinity visitual us to-day. It commenced about indulghit and centimed strainly mutil about hidd-past five this morning and has been pauring at intervals the entire day. About 8 o'clock the Cohorekshik culvert give may at the interval on of two sire its upon which there is a greatfed of travel. The Delewan and Schmykilli rives nevery high: the whatves from Minajunk down are nearlined and an entire through a well as the two path of the said. The water was loan test high in the milis at Manajunk and considerated thing his been done, but the extent is not known. A fixight train ran off the track at this pilee running to a large quantity of earth, which was mashed down upon the rails. All the trains were forced to stop at this point. A bridge was wished down upon the rails. All the trains were forced to stop at this point. A bridge was wished down upon the line of the 2d and 3d street presenger road, preventing the tunning of cars. About 200 feet of high stone wall at the branch Asylium was curfirely demolibed. A costly bridge on the Cohooksuk Greek was entirely swept as yy. The cellars in entire streets in the lower section of the city are laundated and the steam the cugins are busily employed, entervalue to rid, the premises of water; they in the lower section of the city the water in a briven limit of the city the water in a briven was two feet deep. The Wissolickon is very high and it is leared will the bridges have been washed many.

It will here immined that Adminal Dadigine, of one navy, information that according to the result of the result controlled to the Reconnectual of the rehal are edents.

The Democrate Convention at Bowling Girrin, Kentucky, yesterdy monthated Justo S. Gilloway as a condulate for Congress from the Third District to fill the accuracy cused by the death of the Hou. E. Hers.

A failing democratic may be now in session at the Lonisville Hotel, having in view a reduction of rates and the establishment of quick time and recurracy connections. Some twenty rosibs are represented.

represented.

represented. Washington, June 19.
The triat of Survitt was reasoned this morning before Judge Fisher. The prisoner's brother, Isaac Survatt, occupied a seat by the prisoner's

Scorgent Joseph M. Dye was recalled to the

witness stand.

Judge Pierpont asked the witness what occurred on the way out it street, after wilness and his companion stated for Comp Barry after they had received information of the assasination of the President.

Mr. Bundley objected.

On cross examination of Mr. Merrick, the witness, in the melt, repeated has direct testimonys Question—in neavering the questions put by the prosecution, why did you describe the third party as neatly dressed, and not mention has name, as you knew him to be Sarratt?

Answers—Because i did not think it was necessary until 1 was asked the question.

Answer-Beenso i mariot tamk it was necessary until I was asked the question.
Queetian—Why did you use Booth's name and and not Surratt's?
Answer-Beenso I did not deem it recessary to mention Surratt's name.
Question—Were you not told not to name him until asked?
Answer-We did Lyng and

multi asked?
Answer—No, slr, I was not.

Witness saw Fafratt in Murch last, at the jult here, when he was admitted by Gen. Carrington to see it he could identify him as the man who was under the gas light that night, and recognized him immediately. He did not full Sucratt for what purpose he went there, but when he saw him necessed him with "haloo, John." The fixe witness saw in the july was the tree he saw in this dreams, and the face he saw in front of the theory.

Onesteen, here the content of the theory.

Question-And this is the man, pointing to

Surtait?

Answer—Yes, sir, that is the face.
Question—Would you have known that face had you seen it elsewhere?

Answer—Yes, sir, it is a face once seen is not forgotten. I did not request to go to the jail to see him. I went because I was requested to do

DEFTING COMPETITION. SATISFACTION GUARANTEED

Mr. L. PALMER.

Mr. Merrick asked the witness what his religion was, but withdrew the question upon an objustion, made by Mr. Carrington.

The whereas was interregated at length as to his restancy before the Military Commission of the time of the sasination trial, endorsed what he

to prove that Reed had made statements out of court court.

Decision of question reserved till to-morrow. Susan Allen Jackson (colored) testified—Surratt was at his mother's house in Washington on the evening the President was assasinated and identified the prisoner; had never seen him before that time or since till last week, when he was brought into court.

James Sangston, book-keeper at the St. Lawrence House, Montreal, says a men maned John Hurrison registered his name there April 6, 1815, and left on the 12th for New York; same party arrived on the 18th and left almost immediately; could not identify the prisoner as the man.

Mr. Bradley said the defense would admit Surrat, was in Montreal on the 6th and 18th of April, 1807, and that he registered the name of John Harrison. They admitted the names were in Surrati handwithing.

Mr. Pierpont said the prosecution was then saved much evidence.

A coal was exhibited and identified as one similar to that worn by Harrison.

The court hen took a recess till ten o'clock tomorrow.

## The Strawberry Bestival To-Night--A

eted with the Good Templar organization o enthusiasin manifested to the work of prepara on, and the liberality with which the nected with the order have tendered their contributions, we may safely besneak its entire success.

The spacious hall has been tastefully decurated ers. Messrs. Olmsten I d attraction. There is to be a minere postoffice for credentials, and a "gallery of art" in which many unique curiosities will be exhibited. The strawberries have been procured from Philadelphia and Cleveland, per express, and are superior to any previously brought to this market. A soda tountain has been cructed and a confectionery and fruit department will add their entlements

Hill, an announcement which affords a sufficient reccommendation of its quality. The case is in great variety and abundance, all freely con-tributed by the ladies, and from many not identifled with the order.

Prof. Brown's Silver Cornet Band have kindly will perform on the balcony in the early part of Vocal and instrumental music will Coburn having tendered the use of his piano.

It should be borne in mind that the festival all are cordially invited. The admission fen is fixed at twenty conts, and all articles of rofreshment will be sold at reasonable rates

ETERT SATURDAY,-This journal of choice Notes. Hard & Co. have it at the Postomee

Our Franklin Letter. FRANKLIN, June 15, 1807.

graphical error in my last wack's letter. In the case of Wirtzell vs. Heydrick the types say that the verdict was for \$131,427—it should have been \$1,813.97; somewhat of a difference. Just se he result of an apparent insignificant error-the similar little things are fraught with mighty cosequences. The cackling of a goose saved frome Not the mere madvertent dropping of this little period is reging to but so much more money it the plaintiff's pocket, or make the defendant a magnificant debtor instead of a moderate one but it has furnished your correspondent with which, when finished, I do not think will be o nuch account. I wanted to write; I had noth ing to say, and was going to do it by letting alone. Thanks to the error it gave me the oppotunity of getting off an Hibernicism, if nothing better. The hot weather acts as a suporific upon my pen, and, like myself, is inclined to be lazy think however, if it had attended the election held at the court house this afternoon, and im lithed some 'fighting whisky, it would have secured a reating place where laziness is a necessity and the aids to which are furnished at the pub lic expense-I mean the county jail. That is the place where two lazy vagabends named Weish, were conducted by Sheriff Gray and Constable

This evening about seven o'clock there.v quite a commotion in the neighborhood of the Atlantic & Great Western Ruili oud depot, caused by two brothers named Welsh breaking into use and assaulting its inmates. The Welshes reside in the vicipity, and are an eye-sore to it. One of them has recently come out of prison. The father and two sons lend an idle, vagabond the balance of the time in getting drunk and lighting, to the annoyance of the citizens. What makes the matter more disgustingly shomeful is, that a sister is hing in the last stage of consump-tion within hearing of their brawls, not expected to survive from one hour to the next. Sur things as these men are gaugrenos on society whose only cure is entire cradication.

Branen this evening, and left to cool their bel-

ligerent propensities and sleep off their warlike

The Republican Primary Photions were held this afternoon, the results of which have not yet been accurately obtained. At the opening of the polls it was thought that the Hoge party were in the ascendent, as they secured for judge o election Mr. Hoge's intimate friend, James S. Myers, Esq., of Calver prosecution notoriety. The election was largely attended, lively and spirited; and the various candidates nowise averse to the participation of their anti-political friends, the Demograts. As far as I can learn at this early date, the successful candidates are as sociate Judge, James L. Connelly; for county . Wilson Davis, and for County Prensurer, I. A. Christy; Auditor, McComb, and Jury Commissioner, Mofilt. It is thought by many that the nomination of Mr. Duncan will keep a third candidate in the fierd for Assembly This ticket is whomtted to be an Oily City victory Much sport is anticipated at the Convention on Funday next.

Our Court adjourned yesterd by until July 23d, when it will meet for motions and argument There will be no more jury trials in civil causes until about the second week in September, although the next regular term of Court com mences on the fourth Monday of August. The two weeks of Court then held are taken up aliost exclusively in disposing of the criminal cal ander-very uncivil in the etiminals, surely. The session just closed was not very heavy. Many of he cases on the list had been countermanded by the revision of one of the rules, whereby a case, aving once been put upon the trial list, cannot now be countermanded except by the consent is witting of the opposite county, or leave of the

yezationa disappointments. The cases tried were as follows: Weaver & Mitchell vs. Jacob Rhades; action weaver of mercel vs. Jacob Rhades; action of assumpsit; phintiff released certain property to defendant, in consideration of \$4,000, to be paid when defendant sold certain lands. The first installment, \$1,000, was paid. Suit for the

palance: verdict for plaintiff \$3,379 50. W. S. Albertson vs. C. H. Sheppard et al.; as sumpsit on contract for the sale of butter; verdic or plaint!fl \$467,65.

Ninth National Bank, New York, vs. George K. Chase : action of foreign attachment ; defend ant pleaded in abatement a former suit pending for the same cause of action; verdict for plaintiff

Patrick Burns vs. Everett Petroleum Co.; ac tion for work and labor; verdict for plaintiff \$200. John Hoge, Jr., vs. same; same cause of action; verdict for plaintiff \$320.00.

John W. Burke vs. Charles Bisbing et al.; action for work and labor; verdict for plaintiff

Stephen Grener vs. P. R. Gray, Sheriff, and S. F. Phelps and C. Vanline; action of trespass for wrongfully levying upon and selling the goods of the pleintiff on an execution against another man; verdict for plaintiff against the Sheriff and C Vanline, one of the defendants, for \$155.65.

Rhodes Colo et al. vs. Prather, Wadsworth &

Co.; action of assumpsit; by agreement verdict for plaintiff \$2,000. I. C. Hostetter et al. vs. E. H. Disbrow et al.; abtion of ejectment for one acre of ground in Complanter township, being lot No. 24 on the Archibald Buchanan farm. This was a very important suit, as its final result will change the wnership not only of the Cherry Run Hotel in Rauseville, but probably that of the whole of the farm of two hundred and seventy-five acres, which, with its present improvements, is hinmensely valuable. This is only the test case to ter the whole titte. As I was unable to hear the hole of the trial, I cannot give you the detailsthis, however, is the substance of the ovidence addressed on tried. Both matties claim through Archibald Buchanan. The latter, by articles of agreement, sold to Rouse, Mitchell and Brown, he right to dig and mine for oil, sait and other minerals, and also to occupy and use so much of tho had as was necessary for the crection of buildings to be occupied as hearding-nouses, storehouses and such improvements as were necessary to the purposes of carrying out the object of the grant; in consideration of which, Rouse, Mitchell and Brown were to pay to Buchanan a certain proportion of the oil, ant or other mineral products of the land; and which article of agreement was succeeded by a deed, executed between the parties. Ahout the same time, another deed for the land was executed by Buchanan to Dr. Halderman, subject, however to all the rights granted to Rouse, Mitchell and Brown. The plaintiffs allege that Rouse, Mitchell and Brown and their assignces have forfeited their title for mis-user of the land for purposes not essential to the object of the grant to them contending that the character of the buildings to

suitable for laboring men-men who did the ac-

tual digging, boring and mining for oil, sait or

other minerals. That the erection of such build-

ings as this hotel, containing also a telegraph of-

a large livery stable attached, all of which were

and travelers, was contrary to agreement, and were not such buildings for the convenience of men actually engaged in the manual labor of minion as contemplated in the original grant. counsel, and after a careful and learned charge from Judge Trunkey, was given to the Jury, who returned a verdict for the plainlifts. A motion

has been made and reasons illed for a new tria thoroughly examined before the parchaser pays his money, or expends large sums in valuable improvements. This hotel, I am told, cost Geo. K. Chase, the original propeletor, forty thousan

the matter of the sate of the stock of the Warren & Franklin Ruligad, held by the Carion Land and Improvement Company. He reports in rand. The powers of the Auditor were cularged to report upon the propriety of selling the roud, which report will be made after due notice o stockholders and others of the time and place every case. Court ordered a sale of the Warren & Franklin stock, consisting of 3,000 shares, to be made at the Court House in Franklin, in lots of fifty shares each, on due notice by publication in Phil adelphia, Harrisburg, Putsburgh and Venango county, and by such printed handfills as the sequestrated may deem advisable. The par value of the slack is 60y dellars. It will probably

Really, I have triveled over greater space that I expected; as I thought at starting 1 had noth ing to say. However, if the quality equals the quantity, I am content. Of that, I leave you and your readers to judge. Until next wock, adleu Yours, &c.,

A brief telegram acquainted the public with the successful character of the experiment in Boston Bay a few days since to test petroleum for making steam. We have further particulars by mail, and we quote from the Boston Travelles

of Friday eyening: Under the anspices of the United States Gov-erament there has 10-day been made an experierament there has lootay been made an experiment in the use of crude petroleum in steam-boats as a substitute for coal, which has produc-ed most noteworthy results and is destined in of-fect an immense revolution in river and occan navigation. In ten years from this day, or less, we venture to predict, no coal burning vehicles of freight or passage, will be in use. Petroleum, now a drug all over the world, and Jying idle in linexhaustable quantities, will assume a new

value, and coal will be encaper for other pur-poses.

The Palos, in her furn are, has a series of pipes supplied with burners, of which latter there are probably a bundred. A pipe from petroleum lanks on deck supplies the furnace burners— The flame from these burners botts the boliers. The burners by their own heat turn the petro-leum in the pipes into gas, there being an ar-rongment for tifusing air and steam, and this gas supplies the harmers. The flames produced in the furnact are intensely hot.

in the former are intensely hot.

The Pulos has never made in average of corright filles an hour, and her utmost speed was never over nine for a short distance. On this occasion she carried twenty-five pounds of steam steady, made the distance from the Navy yard circuitously to Boston Liph, 113¢ miles, in 45 minutes, an average of 14 miles as hour, with a smooth sea. The pilot stated that the total trip from the Navy Yard to and around the Brewsters and back, 25 aca miles, was made in I hour and 55 minutes. The origineer said that with coal he had never made 25 miles in less than 3½ hours. The United States engineers on bourd were as-

The advantages of petroleum are those: It is clean, occupies but about one-quarter of the room of cost, the great manual labor of slovelling and chippling cost is dispensed with, it will cost that a third of what it costs to burn coal, it gives greatly increased rate of speed, it is safer than coal, which so often takes for from spentaneous combastion, may be instantly shart off from the furnace by inraining a funcei, and steam can be raised in a titrd the time required with coal.

The petroleum used on this trip cost about \$12 or \$15; a shullar trip with coal would have cost, the main officer in charge of the boat stated, not less than \$50 or \$20; the vessel want mently one-half inster than over she went before; two small takes contained all the fuel, and not a quarter of twas used; there is an eaker made, no dust, no multiple of the boat the light of the same of the fuel.

it was used; there is no ashes made, no dust, no muone bases; the boller room is clean and neat. On board the English conseners, for justance, again, forty or fifty and heavers are unplayed, the cabine are often filled with smoke and dust, and a large part of the vesset is occupied for the etorage of coal. With a petroleum farance this would be ruincided, and the trip to Europe be made in one day or a day and a hair less than now.

now. There are other points that might be discussed but we have said enough to show the important There are other points that might be discussed, but we have said enough to show the importance of the insiter. Government has it in hand, and all persons interested in steam univariation, will watch the remaining experiments with interest. The pilot of the bost informed as that the trip was just twenty-five miles, and made in one hoor and fifty-two minutes; and on reaching the dock a innect was turned, and to, the fires were out. The patout has been secured in five foreign countries, and if the United States adopts the system, foreign governments must follow suit.

every oil man who takes up this paper that a enreful perusal of the whole matter will amply repay him for his trouble. It is often said that one man can see no further into a mill-stone than snother, but certainly the fortunate inventors of this wonderful machine, the " CREVICE SEARCHER," if they cannot see down hundreds of feet, can tell you just how every foot of your well would look if it could be seen; where it is mud, slate, pebble, or sand rock; whether there are any, and if any, how many crevices, their exact size and location. Further, they can tell you by their wonderful "searcher" just where the hole is smooth and consequently the place to good-bag. The measurements being all taken by the pole tools, with which the "searcher" is low ered and raised, are exact to an inch. An ope rator having a chart of his well can seed-hag and tube so as to test each crevice, or if he wishes to put in a torpedo he need not blunder away in the dark, but have it exploded exactly opposite

any one of the orevices. It is strange that so simple a machine has not seen invented before, seeing that its necessity as been felt ever since wells were first put down The expense of obtaining a record of a well by this process is a more trifle compared with the value of the information obtained. We have no doniff but that many wells, the drillers' record if which has been lost, will now be charled out by Mesers, Dale and Kenney, and lested. The ivention of the torpedo was and is of the great est importance, but this makes the value of the torpedo tenfold more than before, as it shows where one can be exploded with advantage.

Those who have offered contributions of cake for the Good Templar Festival this evening, are requested to send them to Corinthian Buil this tternoon.

It is also requested that ladies and gentlume who will lend their services toward completing the preparations for the Festival, meet in Corinthian Hall this morning at 9 o'clock.

evening which states that the accommodation train, which left Petroloum Centre at 6.45 p. m., ran off the !rack at Oil City. The engine was slightly damaged and the engineer, James Barnum, was slightly injured.

MEANN FARM, May 17, 1887.

MEANNE SIRM, May 17, 1887.

MEANNE SIRM, Tore examination of my well with your "device Searcher" has given entire satisfaction, and without heatistation I would no ommend its use in every well, new wells as well as old ones. It is of great importance in all cases to know the small has well as the large-criticer, and the exact measurement of each certice from this top of the well, which information is vary importation by obtained with rop one-dimension in an astisfact your machine will find every crolled in a well, and with it you can tell where the rock is hard and with it you can tell where the rock is hard and with it you can tell where the rock is hard and with it you can take a full where the rock is hard and with it you can take a full where the rock is hard and with it you machine. However, if would not one any account his various the record It can then two every crevice without theiry and with his trying to the capture. And thud on with a certainty where to puts 1 or putod it necessary. In testing new wells the exponse, and thud on with a certainty where to puts 1 or putod it necessary. In testing new wells the exponse of guidag a register will be assed three times over ly knowing the exact place to establish, and the point to place the tabling, as that each revise can be tested without bursting the such that the point to place the tabling, as that each revise can be tested without bursting the such that the point to place the tabling, as that each revise can be tested without bursting the such that the point to place the tabling, as the each of the point to place the tabling, as the each of the point to place the tabling, as

to send-bag, and the point to place the tubing, so that each crevice can be tested utilized the strength of the send that the send to send the send that the send of send the send that the send of send the send that the send th RYND FARM, June 8, 1867. Mussus. Dalk & KENNEY-Gentlemen: We won MESSIS. DALE & KEMMER—Conclusion: Woward state that we are much pleased with the operation of year "Orvice Searcher". Our well which year searched had a torpedo exploded in it on the 10th of rebrary less, at 81 feet. We pumped he well since the explosion two monits and did not zer any officer of the explosion two monits and did not zer any officer of the explosion two monits and the not crevice at the point wherea de small crevice above and one below the point of explosion. After centroing the weit which at the first crevice in the third sand, some distance above where the explosion was, and pumpediour lors, when our pump falled. During that time we pumped black wider and particles of power, which colvinees us that In all the two month's pumping we did not draw from that crevice, being table too low. We intend to test each crevice in the third sand by itself. We are so well pleased with the operation of the machine that we will have you search the well, we are now remained down, and hereafter we have the get a regit for with your unchies of all the wells, we are filterested in, before tabing. Respectfully your,

ACKER, BOUTON & June 12, 1867.

ACKER, HORTON & ANOTHM.

CHERRYTERE RUX, June 12, 1867.

MYSSIM. DALK & KREEKY-Siry: We are made pleased with the operation of your "Creeke Searcher" in our well. We are matisfied you can find the crevices in a well, and tail the changes of the control of the were surprised to find the year of the control of the were surprised to find by \$2 feet. If it had not been limit you have const us more than your charge being the world have found on the register you have given us of our well, that we knew nothing about it before. It will be you have not you have given us of our well, that we knew nothing about it before. It will be you have the pay see will for the expresse of the stammation. We limit when we get to pumping we can give you are good result. From what we lave some we would recommend its me in all oil wells, both old and new.

Respectfully Your,

HEXPERS ADMANDAL SANGER.

Messies. Dale & Kenney-Gondender. My well has improved very much slace using your "Crostee Statcher." The machine is a success which cannot be doubt of the machine is a success which cannot be doubt of by my one that wil investigate its meritand one how quick and perfect the machine would show a create, and one could feel the rough case of the well and the changes of the rock by putting his hands on the poles. If any one doubt, let then take hold or the poles hineself during the testing process. I like to know what I am dolog, and an so well pleased with the search that I shall have my new well searched before testing it, sad the uid ones scattered as soon as I draw the tabling.

Respectfully Yours,

Daylo Yammer.

CREVICE SEARCHER. Off EVICE SEARCHER.

Oil quorators need no longer he in the dark in regard to the evelors and smalltion of their wells, from the top to the bottom. The can get a register of new wells; old weils and shandloned wells, so as to know where the sands commence, and where they end, and where to seed-hard, and where to place the tabling, so as to test seach errotes. It is a settled fact that in drilling oil wells, there are more or loss seams or crevices parsed to much. So mon yield vater, some gas, and some oil, and in drilling, the driller frequently thinks he has his crevice. It is a bisulab be four or five inclies deep, he coart discover it by his tools dropping. If this a small provides, he can't discover it, and consequently many into only in crevices are bassed, despecially in the third sand, with:
